PART 1: Review Comments

	Reviewer's comment	Author's comment
<u>Compulsory</u> REVISION comments	Nil	N/A
<u>Minor</u> REVISION comments	Nil	N/A
<u>Optional/General</u> comments	The content of the article is good r^2 values of the regression models are very low. Linear regression models may not appropriate.i.e. to fit the data. It is ideal to choose polynomial regression models to fit the data.	Polynomial regression had been used first and was less appropriate. So a linear trend line was utilised instead.
