SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	In my opinion authors should rewrite the manuscript again. Author look very casual about the writing the manuscript. English was written very badly. Also, Introduction was very brief and author should write with more details and literature survey. Reference in the text as well as in bibliography not mentioned properly. Manuscript can be considered after rewrite so that it can be understand by lay person also.	Thank you for the comments. We kept the introduction short because this work is continuation of the previous published work with appropriated introduction and literature review.
<u>Minor</u> REVISION comments	1) Units in the figures should be mentioned properly. 2) References are not written in one format 3) Unit in graph should be written away from the values. 4) Short form must be written in block letters. 5) Text should be written in Justify way. Ethical issues-: If there are any ethical issue please clarify.	Thank you Done
<u>Optional/General</u> comments
