Manuscript Number:	2014_BJEMT_13796
Title of the Manuscript:	STRATEGIC MANAGEMENT OF GROWTH IN MANUFACTURING COMPANIES IN SUB-SAHARAN AFRICA: A CASE STUDY OF NIGERIA
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
This paper did a lot of improvements, I have some comments: 1. The structure of the paper is not well organized: the authors should follow the "Guideline for Authors" of BJEMT. I would also suggest that: introduction - literature - hypotheses - methodology (descriptions of the data, how to collect the data, measurements and the models ... etc.) - results and discussion - conclusion. 2. The research questions and research objective: looks like the same. 3. The descriptions of the models and data used in this study are not well discussed. 4. The results section: do more detailed explanations.	1. This has been effected to conform to guideline for authors of BJEMT. 2. This is the trend in modern research as the research objectives, research questions and research hypotheses must be related. The number of research objectives must be the number of research questions as well as the research hypotheses. 3. This has been effected. 4. This has been effected.
