SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	As I reviewed, the contributions in the paper are not enough. In the part of Introduction, limited description is related to neither literature nor contribution of the paper. Maybe in this paper, you can rewrite the contribution part in more details, relating to the previous research. Maybe you can find some other papers refer to the contribution, suggesting such as "limited research focused on the African countries, especially Nigeria".	
<u>Minor</u> REVISION comments	More paper about current literature, from 2011 or more currently, should be utilized in your "Empirical Literature". Furthermore, you may review more powerful papers in the top tier journals, such as British Journal of Economics, Management & Trade or other journals in SSCI, which could be reflected in your Reference part.	
<u>Optional/General</u> comments	Your data is quite limited to develop well regression with only n=32 from 1980-2012. As what I suggested, panel data could be collected in the further research. Such as different industries in Nigeria from 1980-2013 or different countries including Nigeria in Africa. Regarding more details in this basic panel data method, you could refer to the Paper published in the Journal "International Journal of Business and Management" - "Inward Foreign Direct Investment, Entrepreneurial Behavior, and Outward Foreign Direct Investment: Evidence from China".
