PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Authors must define or make more clearly “unhealthy romantic activity”. Review the use of adjective “lopsidedness” because its use implies a prejudice. Societal values only change, more conservative or liberal, according to a particular point of view. Description of design is wrong. Descriptive researches do not explore associations among variables neither test research hypothesis (not computing correlations nor regression). Reliability of Multidimensional	Done Done Correction Done Achieved

	Relationship Questionnaire and Sexual Relationship Behaviour Inventory should be reported for each sub-scale of the tool. Internal consistency of 20 items or more together will be always over-estimated. Because large sample, parametric analysis has a big problem, make a mistake, an error type I (small differences are significant). All association will be positive. Non parametric analysis is suggested, establish categories and compute OR and 95%CI). Author must give more information about steps in statistical analysis. Table 5 must be omitted and interpret in text.	Statistical tools used are adequate Not necessary
