

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Education, Society & Behavioural Science
Manuscript Number:	2014_BJESBS_11442
Title of the Manuscript:	A Research Based on the Chinese Distribution System: Social justice, merit principle preference and stress in a low socioeconomic group
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
In the revised paper the author has included ethical consideration and source of funding of the research work(no conflict of interest). Overall, present research work is well done with scientific manner e.g. introduction of theme of research, setting the hypothesis, underpinning appropriate methodology, sampling and procedure towards desired results. The methodology was properly used meted out questionnaires followed by Analysis of variance(ANOVA) among the groups (HPMP/LPMP). The findings of the study reveal a significant correlation between personal value and government policy of social justice. Individuals perceived less stress when personal's value is consistent with the government policy of social justice than those who were inconsistent. Thus, findings gauge insights of political stability and social development among lower socio economic group of people in China well discussed in the existing literature of the domain.
