

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Education, Society & Behavioural Science
Manuscript Number:	2014_BJESBS_14191
Title of the Manuscript:	Cultural Competency for Working in Agricultural and Extension Education
Type of the Article	Review Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The new article reflects many of the changes requested on the previous revision. However, the description of the course overall continues to be quite general – in many ways, it could description of any on-line course – book review, discussion board, etc. I wish the authors would elaborate more on how what they're doing increases cultural competency. More extensive discussion of the unique aspects of this course, like the cultural interview, would be of interest to the readers if they are interested in replicating this course. The paper still lacks significant objective measures of student learning/course success; I do not understand why the IDI results are confidential – it seems that, with IRB approval, looking at these results anonymously could greatly strengthen the paper. However lack of actual data may be acceptable given that this has been submitted as more of a thought piece than a research article. There continues to be a number of grammatical errors that are very distracting and interfere with appreciating the content of the article. These must be corrected.
