

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Education, Society & Behavioural Science
Manuscript Number:	2014_BJESBS_13084
Title of the Manuscript:	PSYCHOLOGICAL INCLINATIONS ASSOCIATED WITH ADOLESCENTS' SEXUAL BEHAVIOUR: THE MODERATING EFFECT OF GENDER
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Congratulations for the contribution to the development of a theme that, in my opinion, is very relevant to understand adolescents and their lifestyles. I hope this study only increases your interest and other researcher's interest in such an important theme. Congratulations I think you improved the article. But you still need to review the references. In a scientific article the references are very important and lots (12) of references are still missing on the reference list: • O'Sullivan, 1995 • Medora and Medora, 1990 • Trotter & Alderson, 2007 • Whitbeck, Yoder, Hoyt, & Conger, 1999 • Smith, 1997 • Ayodele, 2013 • Steinberg, 2007 • Cassidy, 1994 • Thompson, 1994 • Granot & Mayseless, 2001 • Kerns, Klepac & Cole, 1996 • Rubin et al, 2004 On the reference list the references are not yet in accordance with the recommended style. You should read the journal recommendations. The reference Ayodele, K.O. Bello, A.A. & Iro-Idoro, C.A. (2008) should appear after Ayodele, K. O (2011) and Ayodele, K. O. (2009), on the reference list. I suggest to use always behaviour or behavior in all article. For me the phrase "All the secondary schools in the four (4) educational zones (Remo, Ijebu, Yewa & Egba) in the state were given equal opportunity of being selected for the research. The table of random numbers was used to select five (5) schools from each zone, making a total of twenty schools in all. Participants were then randomly selected from the schools with due cognizance to gender. 3000 respondents were contacted for the survey (50 students each from SS1, SS2, and SS3)." Is not still very clear.	

Comment [MRS1]: Still not very clear
