

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Education, Society & Behavioural Science
Manuscript Number:	2014_BJESBS_14545
Title of the Manuscript:	Effect of Level and Diversity of Education on Environmental Awareness

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Place and duration: ... between February 2011 <i>and</i> July 2012. Methodology: Participants in the study were less educated and educated individuals. The less educated individuals involved ... Sample: we included 721 <i>respondents</i> ... Results: [I suggest the authors use the following, only, for the result section] It was found that the highly educated individuals have higher environmental awareness than the less educated individuals. However, the study did not find support for the assumption that diversity in education in terms of science, social science and environmental science has differential effect on environmental awareness of the students. Conclusion: [for this section, use the findings to make a conclusive] not repeating the findings, word for word. 188-189: <i>ranged from</i> 0 to 51 Add at least one recommendation.	The correction 'and' was incorporated. The correction of sentence 'participants in the study were less educated and highly educated individuals. The less educated individuals involved...' needs no change since term highly educated is essential throughout the study. The word 'respondents' were included in the sentence. The unrelated sentence in the results section has been removed. The conclusion based on the study findings has been rewritten. 188-189. sentence has been corrected.
