

SDI Review Form 1.6

Journal Name:	British Journal of Mathematics & Computer Science
Manuscript Number:	2014_BJMCS_13221
Title of the Manuscript:	Nontrivial weak solutions of a quasilinear equation involving p -Laplace operator
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This paper consider a quasilinear equation involving p-Laplace operator. By the least energy principle, the author give the sufficient conditions on the existence of nontrivial solutions. The result is right.	OK.
<u>Minor</u> REVISION comments	There are some spelling mistakes in this manuscript, for examples, page 4, line 7 from above, page5, line9 from above.	The spelling mistakes were corrected and highlighted on manuscript.
<u>Optional/General</u> comments	The result is right but simple.	The simplicity of the results arise from the fact that the characterization of the first eigenvalue of the p-Laplace opeartors is well-known while the situation is very complicated for p(x)-Laplace operators which is not the case for this paper.
