Compulsory REVISION comments		
Minor REVISION comments	<ol style="list-style-type: none"> 1. It is strange that the age at first sexual exposure ranges from 1 year to 23 years. I wonder how the respondents remembered the sexual activity that occurred when they were just one year old! Check this out to make sure it is not a typographical error. 2. Excluding private schools from this study is a big minus on the important variables that need holistic examination by the authors. 	
Optional/General comments	Generally this is a well written manuscript.
