SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	I have reviewed the review article linked to this email and have the following comments: The authors present a very detailed and authoritative discussion of the microbiology and immunology of GBS and more simplified clinical neurologic description but that is appropriate for the intended audience. The description of the gangliosides and autoantibodies is accurate and instructive. A few minor points to consider: line 90. GBS is not typically difficult to diagnose but other acute neuropathy causes can mimic the pattern. Line 92: can simply say that the process is typically symmetric. Other important features include elevated CSF	Thank you Ok. It is corrected Ok. It is corrected

	protein without significant inflammatory cells. I suggest adding the following small points to the clinical description on page 3: The nadir of clinical worsening should occur within one month of onset. I have no issues with the remainder of the paper and find no inaccurate or highly controversial content. Minor copyediting needed	Ok. It is considered
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
