Subject: Re: Request for editorial decision for manuscript number 2014_I-SRR_15859

This is an interesting study and the authors have responded to the reviewer's comments. It would be informative though to know the co-infection rates between the groups and pathogens under investigation. The authors could include an extra table giving this information.

Then, the manuscript could be accepted for publication.

Editor's Details:

Constantinos Petrovas

Immunology Laboratory, Vaccine Research Center, USA
