PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The manuscript has been improved. However, I still think that it needs more English revision. The methods must be written a more scientifically. Here are some examples of writing mistakes.</p> <p>L 20-21, the author wrote: based on our study, then cited two references L 33 none pathogenic L 35 hyphae</p> <p>Material and Methods: should be re written</p> <p>L 102 : every treatment was done in triplicate L 105 Erlenmeyer flasks L 114 Duncan test, what was the P value L 159 8th day L 228 and elsewhere in the paper, mixture instead of mix L 244 against L 257 crude extracts L 283 diseases</p> <p>L 373 delete a after 17</p>	<p>I try to revised all of words or sentences in red highlight or red letters likes you suggested, but for the word mixture I change it (mixed) like the first reviewer suggested.</p>
