Subject: RE: Request for editorial decision for manuscript number 2014_IJPSS_13728

The manuscript „The effect of soil use and management on the chemical properties of and Ultisol” was corrected following reviewers comments. In my opinion, some formal and methodological details should be corrected still.

1. There is now information about soil sampling in “Materials and Methods”. One can get the information about sampling of three soil horizons only from “Abstract” and “Results and Discussion”. Please add the information about soil sampling (horizons, terms of sampling – how many times per year, which month, how was the sampling done – equipment) into the chapter “Materials and Methods”.
2. There are still some formal mistakes remaining in the text:
Row 30 “The current research challenge is the assessment of soil quality of reliable“ ???
Row 59 “the effects.was”
Row 110 The sentence “And the degraded area is cultivated.....”. Better version is “The degraded area is cultivated.....”
Row 159 “Was also observed the same behaviour in research conducted by Ferreira et al (2011).“ Better version “The same behaviour was also observed in research.....”
Row 172 The sentence “Eucalyptus the growth of the root system.....” is not clear, this sentence must be revised. The next sentence “And Fabio et al....” should be improved.
Row 178 The sentence “In grasses.....” must be revised.
Row 189 The sentence “But these treatments...” should be improved.

Editor’s Details:

Dr. Radim Vacha

Deputy Director of Research and Development, Research Institute for Soil and Water Conservation, Czech Republic
