Subject: editorial decision for manuscript number 2014_IJPSS_14320

Basically, the quality of the manuscript was improved by the corrections performed according to the reviewers' recommendations.

However, to follow the indications on paper template some corrections still need to be performed. Recommendations to authors are listed below:

Abstract

Generally non-standard abbreviations should not be used in the abstract.

References in the text must be numbered in order that they appear in the text:

- use number [1] (without the author name) for the first citation in L34 after '...vegetations)', it is the first citation of the manuscript. In L34 after '...is defined in Allen' use number [2], it is the second citation different from the first.
- in L38, L41, L48 use only the number, no need to use the author name.
- check during all the text the correct sequence of reference numbers and its correspondence in the reference list.

Reference list

- not found the references cited in L154, L196, L208 – Doorenboss...
- reference list should be in numerical order of citation in the text and not in alphabetical order.

Introduction

Abbreviations should appear in the text at first use, thus in L34 use: 'Potential or reference evapotranspiration (ETo) is defined in Allen [2]...', then, during the text, when referring to potential evapotranspiration use only the abbreviation ETo (as in L38, L80, L150, L363).

Check this concept to all other abbreviations during the text and correct when necessary.

Table 3: Anions should be wrote correctly: SO_2^- , Cl^- , HCO_3^- , CO_3^{2-}

Table 2: the unit of bulk density: (g/cm^3) not (gr/cm^3) , electrical conductivity: use EC not Ec, unit: use dS/m not ds/m.

Table 5: All terms in the table should be clear for the reader, thus authors should describe also in the table (in the heading or as a footnote) what are the parameters (R, RMSE, MBE and t).

Results and Discussion

L245, L247, L366: still need to cancel 'the month of'

L253: needs the reference number for Jacovides (1997)

L265: use Table 5 not Table 4; use Figure 2 not figure 2

IN MY VIEW THE MANUSCRIPT COULD BE ACCEPTED FOR PUBBLICATION ON IJPSS AFTER CORRECTIONS.
