**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I am glad that the authors addressed my comment properly. The new version recommended some comprehensive measures to treat heavy metal issues. This is more or less similar to the principles and methods of ecological engineering which we put forward and advocated in our publication. I'd like to share our publication with the authors.	Knowledge sharing is very useful in academic growth and we welcome every information that you would share with us. Your paper was really wonderful in dealing with the issue of ecological restoration and had been useful in reshaping this paper.
