

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	2014_IJPSS_13067
Title of the Manuscript:	An understory comparison of the exotic Phellodendron amurense Rupr. (RUTACEAE) and adjacent native canopy species in an urban and suburban woodland

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>It seems that is all right with the work.</p> <p>It bothers me that the hypothesis test not be clarified. It seems he was omitted compared to the first version. Just reply which the test was used to test the null hypothesis ... After informing the hypothesis test, put the values in the text of the test, degrees of freedom and estimates of variability.</p> <p>The manuscript still needs tweaking. I suggest that it is published as a short communication.</p>	<p>I have further clarified this. (see highlighted portion) and added the requested info (see highlights)</p> <p>I believe you may be using a 0-100 count on the GPS coordinates as opposed to the 0-60 count as signified by the hours and minutes notation. The points for the coordinates are correct.</p> <p>I don't understand line two of these comments.</p> <p>Thank You.</p>
