SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment The research dealt with in this manuscript is OK, but presentation as a scientific article is poor.	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The manuscript requires proper use of scientific terms. - All bacterial names should be in Italics. - Wrong usage (example): Line 135: staph aureus . "staph" is not accepted. - In the abstract, Klebsiella, Proteus, Pseudomonas should be in Italics. - Table 1 on demographics includes religion, but no discussion. It may be deleted from the table. - Table 4 on antibiotic sensitivity should be condensed, and the contents should be presented in a generally accepted format. All antibiotics can be placed in one column. The bacterial names and resistance data in columns 2 and 3. ... - The antibiotic name "Septrin" in the table is not acceptable. It should be Trimethoprim-Sulfamethoxazole. - Why does one need a column for "inhibition" (???) - The names of Gram-negative bacteria are not presented in italics. - Line 170: Insert a reference. - Line 174: Contrary to the type ... (Not contrary the type). - Line 187: Abbreviate the bacterial genus name, and use italics. - Line 219: Bar et al ... [10] is incorrect. #10 in	Thank you for your comments and suggested corrections. I have made necessary corrections and highlighted them. The table has been changed accordingly. -Inhibition data has been included for the sake of completion. - Line 170: reference inserted -line 219: correction of Bar et al #10 done

SDI Review Form 1.6

	reference list refers to Kakar, Kumar .. Bar et al is #16. - The abbreviation et al should be in italics throughout. - Please check for typos and grammar throughout.
