**PART 1: Review Comments**

|                                            | Reviewer's comment                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><u>Compulsory</u></b> REVISION comments | <p>-in materials and methods describe socioeconomic and sanitary conditions of the population under study</p> <p>-The paper presents the limitation of the number of samples from each patient (if they were three samples have better results) and was used only one method (Willis) when it should have used at least two different methods.</p> <p>-results also put in sanitary conditions, household income, water supply etc.</p> <p>-Another limitation of the study relates to the age of patients. Probably children will have greater prevalence of helminths which does not apply to HIV patients who are adults</p> |                                                                                                                                                                               |
| <b><u>Minor</u></b> REVISION comments      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                               |
| <b><u>Optional/General</u></b> comments    | The paper presents a significant n                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                               |
