SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	To put the paper into perspective, it would be helpful to give the catchment population for the hospital and to give the proportion of patients admitted for trauma vs all admissions for that time period. The bracketed numbers in Tables need to be explained.	Study has already been conducted in year 2009 to 2010 so it's not possible to modulate and/or add, in the result section of study. Corrected in manuscript
Minor REVISION comments	The language (grammar) needs to be corrected.	Corrected as and where required.
Optional/General comments	The paper provides a nice epidemiological survey of trauma cases admitted to a surgical ward in India.	I appreciate this thing.
