SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. In the title: "SURVEILLANCE OF INJURY IN A TERTIORY CASE HOSPITAL IN INDIA", what does the word "TERTIORY CASE HOSPITAL" or you want it to say: "TERTIARY CARE HOSPITAL" 2. Introductions: a) the objectives of the study seem not to be clear. Like "To find out the different type of injury". What does that mean 3. Material and Methods: a) In the study type, the author said "observational secondary data based study". The author should better specify the exact type of observational study. I think this study is like "an observational descriptive study". B) For study duration, it will be interesting that the author makes a complete sentence. c) for data processing and analysis, it should be better that the author describes a bit the data analysis process and clearly shows the calculation of the parameters. 4. Result and Discussion: a) it should be interesting that the author describe separately the Result and the Discussions. B) From the line 75, it is stated: "In present study Out of total 7885 patients reported, in case of 633, either address or 76 age/sex was not recorded". This needs to be rewrite to make it more understandable. c) all tables need to be self-explanatory. For example, for table1, each square of the table contain three values.	Thanks for comment. I have corrected in manuscript its TERTIORY CARE HOSPITAL INSTEAD OF TERTIORY CASE HOSPITAL. It was typographical mistake. Corrected in manuscript. its prevalence of different type of injuries like RTA, BURN , FALL etc. Thanks for worthy comment. I have corrected in manuscript accordingly. Thanks for worthy comment. I have corrected in manuscript accordingly.

SDI Review Form 1.6

	What those values represent? All the tables need to be revised. Some values are in parenthesis, some are out making the paranthesis empty. For example in table1 at the intersection of “ Total and 30-39” is like this 1421()19.7. Some parenthesis are incomplete.	
<u>Minor</u> REVISION comments	The whole paper needs to be revised by applying the basic rules of English grammar. Like from line 123, “hospital based..... design.” h of the hospital should be in capital letter.	Thanks for worthy comment. I have corrected in manuscript accordingly.
<u>Optional/General</u> comments	Despite above comments, the paper underlined important injury epidemiology based on the study location.	Thanks for appreciation
