

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	2014I_IJTDH_11814
Title of the Manuscript:	Prevalence and pattern of malaria management practices in a rural community in southern Nigeria
Type of the Article	Original research article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Abstract still has to be structured into sub-headings such as. Aims, study design, place and duration of study, methodology, results and conclusion as found in the website http://www.sciencedomain.org/page.php?id=general-guideline-for-authors The sub-title 'age related prevalence' above the bars in figure 1 should be removed. References 5 and 13 do not conform to the instructions at website http://www.sciencedomain.org/page.php?id=general-guideline-for-authors	I strongly think that re-structuring of the abstract is not relevant. I have compared the structure of my abstract with one of the recent paper published by IJTDH. I have removed it. I noticed no deviation in references 5 and 13.
