Manuscript Number:	2014_IJTDH_13282
Title of the Manuscript:	Investigating prevalence rate of HCV, HBV, and HIV co-infection in Khorramabad, iran, in 2013
Type of Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. Limitations of the Study: The author acknowledges inclusion of limitations in the revised manuscript. But, the limitations do not appear anywhere in the revised manuscript. Please state the limitations of the study, preferably in the Discussion section of the manuscript. 2. Grammatical, syntax, and spelling/ typographical errors: the highlighted (revised?) sections of the manuscript are inundated with grammatical, syntax, and typographical errors. For example, Line 2: "frquency"... Change to "frequency". Line 8: HIV, HBV and HCV is... Change to HIV, HBV, and HCV are... Lines 10-12: The prevalence rates of ...HIV-patients have been variable worldwide... Change to vary. Lines 10-14: This sentence is not clear. It is disjointed and convoluted. Re-phrase. Line 15: "isastatistical" change to statistical. Change Cross-sectional isastatistical design" to "Cross-sectional One Shot Case Study Design". Line 22: Spell out "ELISA" Lines 34-35: This sentence is not clear. Re-phrase. Line 64: Sentence beginning with "Fortunately". Change "our" to "Iran". Line 84: Same comment as Line 15 above. Lines 87-89: Sentences beginning with "Sampling..." and "This study..." are not clear. Re-phrase. Lines 94-95: Sentence beginning with "10 out of 500 studied samples..." is not clear. Re-phrase. Change "103" to "One hundred and three"; "studied samples" to "patients"; 52 female and 51 patients were male" to "52 were female and 51 were male". Line 102: Change "3" to three. Line 173: Inappropriate MLA reference style. Change.	Thank you for your comments. According to reviwer was revised. According to reviewer, was corrected.
