SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	The article is very interesting. The work concerns an important topic from the health treat and the environment protection point of view. The layout of manuscript is well considered. Research methods are appropriately selected. I have only a few editorial comments: 1. In abstract, in results section the sentence: "Fifty-nine other bacteria were also isolated: (...)" should be written: "Fifty-nine strains from other species were also isolated (...)" 2. When Authors use only the name of particular species, e.g. <i>Salmonella</i>, they should write: <i>Salmonella</i> spp. (spp. without italic). 3. The name <i>Salmonella typhimurium</i> should be written <i>Salmonella</i> Typhimurium, because the name Thipimurium is not the name of genus but the name of serovar.	
<u>Optional/General</u> comments
