

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of TROPICAL DISEASE & Health
Manuscript Number:	2014_IJTDH_13283
Title of the Manuscript:	MALARIA DIAGNOSTIC TESTING AMONG PUBLIC HEALTH PHYSICIANS, NIGERIA
Type of Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Lines 13-15, 85-87: correction of sentence structure required.	Corrected
Line 162-163: The sentence is complete but it conveyed a conflicting thought that requires correction. The reason for their actual low level of testing is not their high level of awareness of diagnostic testing. The difficulty here is partly due to the failure of this work to explore reasons for their findings. Simply discuss the low level of actual testing found by other researchers in this paragraph while focussing paragraph 1 on high level of awareness.	Corrected
Besides paragraph 1, the rest parts of the discussion section are unduly scanty. Full texts of articles cited should be carefully reviewed by these authors to ensure a more robust discussion in this paper; or additional literature search should be done on the theme of every paragraph of the discussion.	Corrected
