

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Research Journal of Pure and Applied Chemistry
Manuscript Number:	2014_IRJPAC_13712
Title of the Manuscript:	Biosorption of Metal Ions from Aqueous Solution by Immobilized Moringa oleifera Bark

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The technical content was modified. Be careful with the changes made (in blue or yellow) because there are bonded words, example: "wassun" instead "was sun" I propose to delete the next sentence "...The above process was repeated by mixing other set of blend with 4% of the stock solution of the sodium alginate and <i>M. oleiferabark</i> admixture at a ratio of 100:0 90:10, 80:20, 70:30, 60:40 and 50:50..." Since the adsorption experiments with the other ratios were not conducted. I made this observation as a compulsory change in the earlier revision and it was ignored. I suggest deleting that sentence.
