

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Journal of Agriculture and Ecology Research International
Manuscript Number:	2014_JAERI_14178
Title of the Manuscript:	Economic valuation of rice crop damage by Red-billed Quelea and other pest birds on a rural irrigation scheme in western Kenya

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors, some of them incorporated in the text, analyzed the comments made above. Moreover, others were justified consistently. I believe that with the changes to the text became more clear, informative and easy to read. Just ask once again that the text be revised, especially regarding the spelling of some words, period of the study (abstract), and other details. These considerations being made, I am sure that this manuscript will be a source of reference for many other studies.	• We have gone through the entire manuscript once again and made further corrections in spelling, removed some repeated words and phrases, made revisions on language use and grammar. • We have made the correction on the title page to re-connect the "Corresponding author" to the "Email address" • We have also clarified about the period of study in the abstract, to make these consistent with the entry under Methodology • We also acknowledged the anonymous reviewers for their suggestions, which we had mistakenly omitted in the earlier version • All these changes have been highlighted in yellow to make it easier to track them against the earlier version. • We have supplied the finally revised version of the manuscript in PDF format
