

SDI Review Form 1.6

Journal Name:	Journal of Agriculture and Ecology Research International
Manuscript Number:	2014_JAERI_13636
Title of the Manuscript:	Effectiveness of Miraba Soil Conservation Practices on Soil Erosion Control and Crop Yield in the Usambara Mountains, Tanzania
Type of the Article	Field and laboratory experimentation(Applied Original Research)

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>General-FINAL-</u> comments	Field and laboratory experimentation/monitoring/evaluation (and statistically significant) of indigenous soil conservation measures such as Miraba to recommend the most effective /cheap measures that could be implemented and maintained by local farmers in order to improve agricultural practises are highly recommended in the third world countries. Therefore, such improved indigenous soil conservation measures, which are fully adjusted to local cultural and physical landscapes must be encouraged in Tanzania and other similar environments in East Africa. I recommend to publish this research paper as it is without any changes, and I consider it an excellent/integrated piece of work.
