SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	On line 174 you wrote that the dose of indomethacin used on carrageenan-induced paw edema model was 100mg/kg, however on table 2 and figure 2, you wrote that the dose of indomethacin was 10 mg/kg. My question is, which dose did you use for this experiment. On section 3.3 you said that at 4 hours the CLEPH (at 800mg/kg) demonstrated an inhibition of 55%, whereas the indomethacin indicated an inhibition of 48 % at the same time (4 hours). This is a great result! However, I didn't see these results represented on figure 2. On figure 2, the graphic indicates that indomethacin has a better activity than CLEPH (800 mg/kg) at 4 hours.	100 mg/kg was a typing error. The dose of indomethacin used was 10 mg/kg. this has been corrected.
<u>Minor</u> REVISION comments	Minor orthographic mistakes on lines 41 (ectract) and 81 (feed) On line 87 you wrote "thirty mice were divided into six groups of six " . you should rewrite that, I believe you meant "thirty six mice"	Corrections have been made and highlighted.
<u>Optional/General</u> comments	On section 2.1 you should add the code of the voucher, this could enrich your manuscript	The voucher number has been inserted.
