SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The authors examined the effect of AMH Age-specific among infertile women compared with fertile women. The paper contributes to the understanding of the causes of infertility feminine, and compares the concentrations of AMH in patients of different ages. The results also can contribute to development of new strategies for treatment of infertility, taking into consideration the age of the patients.	Thank you for comments.
<u>Minor</u> REVISION comments	- RESULTS AND DISCUSSION (Page 3, line 89): suggest using the following paper in the discussion: "Reshef Tal et al., Characterization of women with elevated antimüllerian hormone levels (AMH): correlation of AMH with polycystic ovarian syndrome phenotypes and assisted reproductive technology outcomes. American Journal of Obstetrics and Gynecology, Volume 211, Issue 1, 2014."	The reference has been added as reference #13 as per the suggestion of the reviewer.
<u>Optional/General</u> comments	I have recommended publication, but also suggest some minor revisions of the manuscript. Ethical issues: There is no ethical issue that prevents the publication.	A statement as to the acceptance of the study by the IRB has been added to the Methods section.
