SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Please follow the author guidelines of the journal for the references. Most of the references (except 4) were published at least ten years before. Please update reference list and add some more (I think 8 references are few). The manuscript has to be written in appropriate English. Please consult a native English speaker. The “conclusion” paragraph is not appropriate for this case report. Please mention the main conclusion of this article.	5 more references added. It is important that older references were taken to imply the importance of conventional diagnostic technique as well as the history and prevalence. We have written it to the best of our ability. However; modifications are done. Main conclusion to the article added.
<u>Minor</u> REVISION comments		NA
<u>Optional/General</u> comments	This case report is interesting and well organized and designed.	Thank you
