PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. The revised paper has been shortening as suggested although it is still relative long. And also some questionnaires and data are removed to focus on the attitudes and its public health administration issues. Overall the article is now reasonable. 2. Please delete "whether the introduction of the treatment has had any impact on the health status of PLWHA". The study design and results do not justify the attempt of the study. 3. Conclusions: please state clearly whether you hypothesis had been answered.	1. Ok. Thank you. 2. "This study was an attempt to find out whether the introduction of the treatment has had any impact on the health status of PLWHA" has been deleted from the abstract. 3. Done. It follows from our conclusions that all the stated hypotheses have been answered. Thank you very much for your useful and valuable comments.
