Subject: Odp: Request for editorial decision for manuscript number 2014_JAMPS_13809

The manuscript **2014_JAMPS_13809** needs minor revision before publication (see comments below).

Comments to the Authors

The submitted manuscript is interesting. It was previously evaluated by international reviewers. Affiliations of both authors are strange since none of them are medically trained health workers. However, study was well-conducted and text is informative. Before publication the study limitations have to be presented in detail. Abstract should be more familiar for potential reader. Instead of data regarding statistical methods (that should be explained only in main text) obtained results should be presented more deeply. List of references has to be reworded. In case of 'World AIDS Day Report - Results' and reference 12 the web address is missing. Reference 8, 13 and 15 looks strange. Source (journal name) is missing in reference 10, 11 and 14. Moreover, some new data from various medical journals will strongly improve the manuscript (see pubmed.com).

Editor's Details:

Franciszek Burdan, Experimental Teratology Unit, Human Anatomy Department, Medical University of Lublin, Poland
