SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This is an interesting paper and it distillates a huge effort and work from the authors. It is a very well written manuscript resuming different eye conditions in the Niger delta. From a European perspective this kind of epidemiologic studies have a major role.	
<u>Minor</u> REVISION comments	Please try to make clearer hypothesis of the hypothetical relationship between pollution and eye health. This would make the whole paper more clear and understandable. Furthermore, there is some misbalance between the level of knowledge of the description of the eye conditions (too basic) and the level of detail oil and gas and other pollution agent's description.	
<u>Optional/General</u> comments
