

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Archives of Current Research International
Manuscript Number:	Ms_ACRI_24570
Title of the Manuscript:	The Impact Of Financial Structure On Firm Performance: A Study Of Nigeria Agricultural And Healthcare Sector
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Although author has revised this paper, but I found the revisions were incomplete. 1. The author has to discuss all independent variables in equation 3.1, but, it is not clear why these variable- Tangibility, Size, Growth, Risk and Tax do not discuss in the equation 3.1. 2. All models use same independent variables in the paper, suggests the author to delete the equation 3.2~3.9. 3. Cite a source with three or more authors, we will use the first author's name followed by "et al.". The last add a dot. 4. Consistency is important. Cite a source with two authors in the text, we will use the word "and" between the authors' names. For example, section 2.2, Modigliani and Miller (1958), Jensen & Meckling, 1976. It is not consistent. 5. The format of the reference list still is not standard, author(s), book title, article title, publisher, date of publication, and page number(s), are missed somewhere.	1. All the independent variables have been succinctly discussed as you pointed out. 2. Equation 3.2 to 3.9 have been deleted as highlighted. 3. The corrections have been effected. 4. This inconsistency has been corrected accordingly. 5. These corrections have been corrected. All the corrections were highlighted in yellow colour in the text.
