**PART 1: Review Comments**

|                                            | Reviewer's comment                                                                                                                                                                                                                                                                                                   | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b><u>Compulsory</u></b> REVISION comments | This can be published only as short communication after ruling out the facts that the blood donors did not have infection prior to the blood donation . It should also be pointed that the donors acquired the infection from the materials during blood donation as there was no question of transfusion of blood . | Thank you very much for your prompt suggestion. But we need to publish that paper like an original research papers because it will allow the government and especially the ministry of health and others non-governmental organization to help the people in this area by making a blood safety monitoring service in this part of our the country. The lack of data regarding the management of blood transfusion is the real public health in this area. It is the reason why, we have decided to work about this topic in order to make available data on infections that are transmissible through blood transfusion. And these data will serve as a basis for this project to reduce the risk of transmitting diseases through transfusion. |
| <b><u>Minor</u></b> REVISION comments      |                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b><u>Optional/General</u></b> comments    |                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
