PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I have worked on some aspects of the work to improve clarity. However, some more clarifications will be required as I have indicated in my review comments on the relevant sections in the manuscript. The discussion in the last three paragraphs needs to be focused and consistent with the aims and objectives of this work. The referencing is still very poor. Authors could avail themselves guidelines of your journal to be guided appropriately.	My Dear, thank you very much for all what you have done to make our paper perfect. We are grateful for your assistance and we are noting those with thanks. Fortunately we have already made correction by the suggestion (assistance) from your college. As you see, we just already change the topic and add others things. Once again, thank you very much for your kindness.
