

**SDI Review Form 1.6**

|                          |                                                                                                 |
|--------------------------|-------------------------------------------------------------------------------------------------|
| Journal Name:            | <a href="#">Archives of Current Research International</a>                                      |
| Manuscript Number:       | Ms_ACRI_43042                                                                                   |
| Title of the Manuscript: | Ochnaflavone, a Naturally Occuring Biflavonoid: Pharmacology and Prospects for Further Research |
| Type of the Article      | Review Paper                                                                                    |

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

|                                     | Reviewer's comment                                                                                          | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Compulsory</b> REVISION comments | Please provide more detailed information regarding the molecular mechanisms of anti-cancer by biflavonoids. | Agreed                                                                                                                                                                        |
| <b>Minor</b> REVISION comments      | Please propose how to improve the bioavailability of these compounds.                                       | Agreed                                                                                                                                                                        |
| <b>Optional/General</b> comments    |                                                                                                             |                                                                                                                                                                               |
