PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The article is interesting because the authors attempt to establish a relation between the library, education and sustainable development. However, it is recommended that the authors better develop the problematic of the study as well its theoretical foundation in relation to the issue of libraries as an educational tool for sustainable development. References are adequate, yet it is necessary that the authors use them to explore the foundations of the study. The authors stated that this article highlighted the problems militating against the performances of library and educational system and made some recommendations; however, they do not show empirical evidences that support this assertion. It is recommended that the authors provide detailed methodological procedures, as well detailed results and discussions, which must be in accordance to the theoretical and methodological foundations adopted in this study. They also need theoretical and empirical evidences that support the assertion that it is necessary to repose and revamp their libraries and the entire educational system in other to make much progress towards sustainable development in Nigeria. The lack of detailed methodological procedures is a problem that the author need to overcome.	
Minor REVISION comments		
Optional/General comments
