

SDI Review Form 1.6

Journal Name:	American Chemical Science Journal
Manuscript Number:	Ms_ACSJ_22090
Title of the Manuscript:	Synthesis and Characterization of a new Triazole complexes for Cu(II), Ni(II), Co(II), Zn(II) and Fe(II)
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	The paper is almost similar to a published work "Preparation and Characterization of a new metal complexes containing p-hydroxyphenyl telluriumtribromide and Triazole compounds Dr. Nuha H. Al- Saadawy, <i>International Journal of Advanced Research</i> (2015), Volume 3, Issue 8, 1351 – 1358". The author should write what are new features in this work. Complexes should be characterized by TGA and XRD.	1- This research is the main because I started to work before mentioned search, but delayed our writing and send it to you for publication for work-related reasons 2- New compounds prepared and characterized only measurements mentioned research 3- It is difficult to hold additional analyzes required because it does not exist in Iraq and take a long time to complete them outside the country
