

SDI Review Form 1.6

Journal Name:	American Chemical Science Journal
Manuscript Number:	Ms_ACSJ_21119
Title of the Manuscript:	Vitamin C (L-ascorbic acid) content in different parts of Moringa Oleifera grown in Bangladesh
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The authors present an interesting analytical study dealing with the vitamin C content in various parts of the plant <i>Moringa oleifera</i> . The used methods are adequate. In the statistical part, I recommend to show not only the r^2 factor but also the level of probability p.	
<u>Minor</u> REVISION comments	In the text, minor typing errors occur, for example line 44 (Anti-inflammatory).	
<u>Optional/General</u> comments	I like that the authors used the traditional detection with the photodiode array detector which in some cases, may shows higher selectivity than today more popular MS detector.
