

SDI Review Form 1.6

Journal Name:	American Chemical Science Journal
Manuscript Number:	Ms_ACSJ_22090
Title of the Manuscript:	Synthesis and Characterization of a new Triazole complexes for Cu(II), Ni(II), Co(II), Zn(II) and Fe(II)
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The manuscript deals with the synthesis and characterization of transition metal complexes of a certain triazene derivative. Complexes of this composition were not reported before, therefore the manuscript can be published even without X-Ray crystal structure analysis after a minor revision. The paper deals with TRIAZENES, but in the title and abstract TRIAZOLES are mentioned instead. These misleading mistypes should be corrected everywhere in the text. The last part of introduction mentions organotellurium derivatives as one of the objects of the manuscript. However, none of them are discussed in the text, this phrase should be removed from the text.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments		

Reviewer Details:

Name:	Andrei S. Potapov
Department, University & Country	Department of biotechnology and organic chemistry, National Research Tomsk Polytechnic University, Russia
