

SDI Review Form 1.6

Journal Name:	American Chemical Science Journal
Manuscript Number:	Ms_ACSJ_26348
Title of the Manuscript:	Effects of Activation and Modification on the Microstructure and Composition of Fly Ash
Type of the Article	Short Research Articles

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Authors may provide some latest references and rewrite introduction part.	We have added some latest references to the introduction part. And, the contents of the newly added content in the article has been marked with yellow.
<u>Minor</u> REVISION comments	The paper is well written in both structure and description of the material and method except Grammar errors, and authors are suggested to make corrections and careful check to the language, and the whole manuscript is suggested to be revised and polished by an native English speaker. e.g. Last paragraph in page 5" What can be seen from table 2,"	We have carefully checked the article and made a revision of the article. And the revised section has been marked with yellow in the article. For example, Last paragraph in page 5 "What can be seen from table 2," changed to "It can be seen from table 2,"
<u>Optional/General</u> comments	Authors are suggested to quote some papers from ACSJ in the reference part.	I'm sorry I didn't find a reference to the fly ash in the American Journal of chemical science.
