

SDI Review Form 1.6

Journal Name:	American Chemical Science Journal
Manuscript Number:	Ms_ACSJ_28258
Title of the Manuscript:	Thermal Properties, Crystal Structure, and Phase Transition of Racemic $\text{CaC}_4\text{H}_4\text{O}_6 \cdot 4\text{H}_2\text{O}$ Single Crystals
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. The photograph of the grown crystals must be included in the paper 2. Some more references on calcium tartrate crystals grown by gel and other methods must be included. 3. Grammar check must be done.	We wish to thank you for your useful comments. 1. According to the reviewer's comment, we added a photograph of DL-$\text{CaC}_4\text{H}_4\text{O}_6 \cdot 4\text{H}_2\text{O}$ crystals grown by the gel method. 2. We could not find references on calcium tartrate crystals grown by other (non-gel) methods. Thus, such references have not been added to the reference list. The tartrate crystals in most articles listed in the reference list have been grown by gel method. Then, we decided that new references in relation to the gel method are not necessary to add to the list. 3. The English grammar has been checked carefully.
<u>Minor</u> REVISION comments	The paper must be modified and to be resubmitted.	Thank you
<u>Optional/General</u> comments
