

SDI Review Form 1.6

Journal Name:	Asian Journal of Chemical Sciences
Manuscript Number:	Ms_AJOCS_44606
Title of the Manuscript:	Synthesis and Characterization of Maleic Anhydride Modified Walnut Shell
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	There is a mistake on the title: anhydride and not anhydrite. The title must be reformulated: Walnut shell modified by maleic anhydride: Synthesis and characterization The resume does not explain properly the aim of the work; it might be rewritten with more attention to the details. I do not agree with the method of titration of the carboxylic acid present in the modified polymer. A standard method must be used using phenolphthaleine under nitrogen flux. The paper must be rewritten by given more attention to the details.	Have corrected. Have rewritten. We have measured the carboxylic value in this method, and the error between the result and the original result is less than 1%. Have rewritten.
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
