PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	Please, check the lack of spaces and correct grammatical errors. I didn't find the tables I, III, IV and V. I believe some references need to be updated. The most recent is 2015.	Numbering errors for tables. Errors corrected(only tables I,II and III are presented) This study was carried out in 2016.To the best of our knowledge, few studies have been carried out in our setting on this topic; thus having references that date back to at least 2015 was a challenge
Optional/General comments	The object of study of the article is relevant and its objectives are clearly presented. The materials and methods are well described, so that other researchers can easily replicate the experiments described. The authors present well-controlled data with relevant discussion. After suggestions for corrections the article will be ready to be published.	Thank you for suggestions and comments
