New title of the Manuscript:	FALSE NEGATIVE TESTING OF TWO HIV ANTIBODY ELISAs IN COMPARISON WITH A COMBINED ANTIGEN-ANTIBODY ELISA IN A HOSPITAL-BASED BLOOD BANK IN NORTH CENTRAL NIGERIA.
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
Manuscript is not well written although the work is scientific. Discussion part is too long. It should be only 2 pages. English should be improved.	Your comments are appreciated. The paper has been rewritten in response to your criticisms. However, I wish to advise that as a reviewer, we are expected to take time to bring out those SPECIFIC issues in a paper that needs review by the author(s) rather than making blanket statements. In making generalized conclusions as these, you may not be advancing the scientific knowledge intended for dissemination. Thank you.
