PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Why don't you consider changing the title to something like 'Seroprevalence of HBsA carriage among blood donors in a rural health area in the northeast (Isangi) of DR Congo'.</p> <p>Abstract; you sited Kisangani under results but Isangi under conclusion. Are they the same?</p> <p>Keywords; HBs antigen, not HB antigen.</p> <p>Methods; The study population consisted of all subjects who donated blood during the study period from January1, 2010 to December 31, 2017.</p> <p>Abstract-methods; A cross-sectional study was conducted in the Isangi Rural Health Zone from January 1, 2010 to December 31, 2017, involving 2,298 volunteer blood donors. Are all the donors volunteer donors? If yes, please correct the statement in the methods. But your results shows two categories of donors; relative and voluntary donors.</p> <p>In the tables under results, I believe all the 'commas' in the percentage are supposed to be 'dots'</p> <p>Tables are not numbered and the last tables looks like repetition of the first table.</p> <p>References need to be in the same format.</p>	
Minor REVISION comments		
Optional/General comments	The manuscript needs serious revision
