Manuscript Number:	Ms_AHRJ_43647
Title of the Manuscript:	SEROPREVALENCE OF THE CARRIAGE OF ANTIGEN HBs IN BLOOD DONORS IN A RURAL HEALTH AREA IN THE NORTHEAST OF DR CONGO (ISANGI)
New title:	Seroprevalence of the carriage of Hepatitis B Surface Antigen among blood donors in a rural health area in the northeast of DR Congo (Isangi)
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Reference numbers 19 and 20; the year needs to come before the volume number like in other references.</p> <p>Table 3 is not clear enough. The values under 'N' i believe represent the number of subjects in each demographic characteristic so it should not be under the HBsA positive column, it should be separate because that is the number of people screened in each demographic characteristic while HBsA positive should have its own N(%) as it stands for the number and percentage positive to the infection.</p>
